Identify and Remove Suspicious browser extensions:

Objective:

- Learn to spot and remove potentially harmful browser extensions.

Environment & Prerequisites:

- Any web browser (Chrome, Firefox)

Observations:

- ### Extension Review Process:
- I accessed the browser's extension manager and reviewed all installed extensions.
- Each extension was checked for its purpose, developer credibility, and permissions.

- ### Security Awareness:
- I learned that some extensions can request sensitive permissions such as access to browsing history, clipboard, or even passwords.
- These permissions, if misused, can lead to data theft or privacy breaches.

- ### No Suspicious Extensions Found:
- All extensions installed on my browser were verified to be safe and commonly used.

- No extensions had excessive or suspicious permissions.
- No unknown or untrusted developers were found.
- **Performance Check:**
- After reviewing and confirming the safety of extensions, I restarted the browser.
- No noticeable performance issues were observed, indicating a clean extension environment.
